

tips on selecting a caster

When selecting a caster, take into consideration weight of load, acids, oils, chemicals, surface types, surface changes, transport distance, cart washing, and noise suppression requirements.

FWE STANDARD

Heavy-Duty EZ Roll

Chemical Resistant
Rolls Easily on Carpet and Smooth Surfaces

CAPACITY: LBS EA CASTER

5"	800 LBS
6"	1000 LBS
8"	1200 LBS

These 2" wide casters provide high weight capacity along with floor protection. EZ Roll casters roll easier than other casters under heavy loads, especially on softer surfaces. Heavy-duty patented dual precision QuadX bearing is maintenance free.

Cabinet Mobility Factors:

- Casters with harder density and rounded wheel tread will provide easier transport on carpet.
- The larger the caster, the easier it rolls.
- The greater the expected transport weight, the larger the caster wheel should be.
- The larger the wheel and the softer the wheel, the greater the ability to roll over thresholds and similar obstacles.

Multi-Terrain Quiet-Ride

All Terrain
Sturdy Cushion
Round Tread

CAPACITY: LBS EA SWIVEL CASTER

5"	400 LBS
6"	500 LBS
8"	600 LBS

Considered to be the best choice for the most demanding operations and satellite applications. Combining the cushioned ride of a full pneumatic with an easier roll of a hard tread.

Cart Wash Quiet-Ride

Corrosion Resistant to Chemicals, Water & Steam

CAPACITY: LBS EA SWIVEL CASTER

6"	500 LBS
----	---------

These casters are designed for cart wash applications for non-heated carts. The stainless steel bearing provides corrosion resistance to chemicals, water and steam. They are a smooth and quiet rolling caster on hard and uneven surfaces. **Static-dissipative** for hospital environment.

Semi-Pneumatic

Tubeless
Never flat
Tread for uneven surfaces

CAPACITY: LBS EA SWIVEL CASTER

6"	250 LBS
8"	280 LBS

These casters are made of hard rubber and immune to punctures. A semi-pneumatic caster has no inner tube and therefore is never flat. The tread is similar to a pneumatic caster to carry loads over uneven or outdoor surfaces.

Under Counter or Stationary Applications:

- 3.5" SWIVEL CASTER
- 4" Adjustable Legs
- 5" Total Lock

● Rolls Easily on Carpet and Smooth Surfaces
● Chemical Resistant
● Durable

Hard Density

Quiet-Ride casters roll easily and smoothly, suppressing noise through the hospital environment.

Soft Density

● Passes Over Obstructions Easier
● Reduces Noise
● Protects Floors

All FWE transport casters have the same mounting plate configuration and are field interchangeable.

FWE has simplified the caster choices to provide the best results for foodservice environments.

Special order casters are available upon request.
